GH-type

Dimensions

Back panel width = cabinet inner width – 92mm; Back panel height (P = 68mm / G = 127mm / GH = 180mm) * 16mm

Bottom board width = cabinet bottom width – 80mm; Bottom board depth (series length) – 8mm

Installation Steps

- * Use the adjustment screws on the slide to fine-tune the plastic screw so that the front and rear panels can be adjusted ± 3 mm.
- * Slide the drawer into the cabinet and install it.

After inserting the drawer, the slide will automatically lock in the track. Push the drawer in, then lift it up, and the slide will automatically lock in the track. To remove the drawer, pull it out and lift it up.
